EDUCATION

University of Minnesota, Twin Cities
College of Science and Engineering
Bachelor of Science, Computer Science
Minor: **Management of Technology**

Minneapolis, MN
(Expected Graduation Date) Fall 2025

SKILLS

Technical Skills: Python, Java, C, C++, OCaml, DSA, Git, Linux, JS, Bootstrap, React, Flask, Azure, SQL, CI CD pipelines, Testing.

Business Skills: Marketing and sales, Stock Market, Data Analysis, Strategic Planning, Financial Analysis and budgeting, Business Development.

RELEVANT EXPERIENCE

MSR Cosmos group

Seattle (remote), USA

Software Engineering Intern

May 2023 - July 2023

Deployed enterprise applications on Azure, ensuring seamless integration.
Analyzed large datasets using AI tools to extract actionable insights.
Developed a Selenium-based test framework, reducing testing time by 25%.
Contributed to ERP consulting and web application modernization projects.

University of Minnesota

Minneapolis, Mn

Usability Services Assistant

Sep 2023 to Present

Managed client-stakeholder-participant interactions and recruitment.
Enhanced project efficiency through detailed usability studies.

University of Minnesota - Twin Cities

Minneapolis, Mn

Teaching Assistant

June 2024 to Present

Facilitated student learning in key software development areas such as program design, data structures, debugging, I/O, and coding standards through a comprehensive programming project.

PROJECTS

UMN Event Hub: Developing a campus-wide event platform, similar to Eventbrite, for the University of Minnesota, integrating personalized *event recommendations*, *custom registrations*, and interactive features to streamline *event discovery and engagement*.

Jewelry Management Software: Developed and deployed comprehensive stock management software for my family's jewelry business in India. The system includes advanced *inventory tracking*, *billing*, *invoicing*, and *staff management*, with features like real-time stock updates, *automated purchase orders*, *low-stock alerts*, and *sales performance analysis*.

Drone Delivery Simulation: Using C++ and .Net

Portfolio: Using HTML, CSS, JavaScript, React

Automated fact-checking system: Using Python, NLTK libraries, TensorFlow, Django, and AWS cloud (Currently working)

Emotion-driven Music Playlist Generator: Using Python, .NET, TensorFlow, OpenCV, Speech recognition, Spotify API, Flask, Django, AWS cloud (Currently working)

Tetris Game: Using Python

Ready to launch an E-commerce website: Using .NET

Minefield Game, Chess Game, Fractal Images: Using JAVA and its Data Structures

CERTIFICATIONS

Web Development, Stock Market, Introduction to Deep Learning, Python for Machine Learning, Prompt Engineering for ChatGPT
AWS Cloud Technical Essentials

Book Publication

July 2023

Authored and Published a globally accessible book titled '**25 Phases of Life**', distributed via major platforms including Amazon. The book explores the diverse phases of human life, providing insightful narratives and reflections.
